San Francisco / Bay Area

SKILLS

JavaScript, React.js, Redux, Node.js, Python, Flask, PostgreSQL, Git, TDD, HTML5, CSS3

PROJECTS

Goodeats (Python, Javascript, HTML5, CSS3, React, Redux, PostgreSQL, SQLAlchemy)

[Live Site](#) | [Github](#)

A single-page Yelp clone that allows users to find the best local restaurants, create restaurant pages, and share their experiences.

- Designed an algorithm with JavaScript to dynamically render the review count and overall rating for each restaurant
- Established privacy for users through front and backend authentication using JavaScript and Python as well as React Router, enabling certain users to edit restaurants and reviews upon logging in.
- Built an algorithm using JavaScript to display the count of the star rating for each review.

Oney (Python, Javascript, HTML5, CSS3, React, Redux, PostgreSQL, SQLAlchemy)

[Live Site](#) | [Github](#)

An Etsy clone allowing users to sell, purchase, and comment on products.

- Constructed a photo selector using JavaScript and CSS3 to dynamically render a chosen product image.
- Implemented styling and design for the product page and edit forms using CSS3 to ensure a smooth and pleasant user experience
- Implemented a demo user login using JavaScript allowing users to try out various features of the website.

Idyllic (Javascript, Express, HTML5, CSS3, React, Redux, PostgreSQL)

[Live Site](#) | [Github](#)

A web app inspired by Flickr, built with React, Redux, HTML5, and CSS3

- Created a welcoming user experience using CSS3 for the landing page to allow users to be immersed in the experience of sharing images through the app.
- Enabled privacy for users through backend and frontend authentication using CSRF tokens to allow only certain users to have access to posting and deleting photos and comments.
- Formulated frontend error handling using JavaScript that allowed for image urls to be submitted to allow the image to render properly on the app.

EXPERIENCE

Onboarding Contractor

Mercury - Banking for Startups, Jan 2021 - Apr 2021

- Achieved over 1000+ new client signups with my team to allow the company to see growth
- Collaborated with team members to ensure new clients had submitted the correct documentation
- Advised clients regarding their onboarding material to ensure a smooth process.

Rehab Aide

Select Physical Therapy, Aug 2020 - Mar 2021

- Guided 16 - 18 patients a day during my 8 hour shifts through physical therapist prescribed exercises to increase mobility and strength, and decrease pain
- Administered pain management techniques through the use of TENS therapeutic machines, ice, and heat treatment
- Trained new hires on the techniques and exercise modalities to use for patient treatment

VOLUNTEER

Co-Head Lion Dance Coach

West Portal Lion Dance Team, Feb 2016 - Feb 2019

- Taught all new choreography, music, and designed new costumes for the lion dance program to showcase in their performance for San Francisco's annual Chinese New Year Parade, and various cultural performances
- Ensured that the children at West Portal Elementary school had a safe place to learn the art, sport, and culture of Chinese lion dancing through this after school enrichment program
- Coordinated weekly practice schedules with more than thirty team members and families

EDUCATION

App Academy - Immersive software development course with an emphasis on full stack web development (Winter 2022)

University California @ Davis - BS - Human Development (Summer 2017)
